Philadelphia: Anthony Finley Type: Wall Map Size: 132x156 Scale 1:2,300,000 Reference: cf Karrow 1-1472 (1831 edition).
This 1833 edition is later than any recorded edition (Karrow shows editions of 1825, 1829, and 1831). There are numerous changes from the 1825 edition: the addition of counties in the developing states, changes to the statistical table to include the census of 1830, new roads, the reduction of Arkansas Territory, and the addition of three canal profiles, two of which replace the steamboat route table and the other placed above the main title. Without rollers. Full color by state or territory.

FISHER, RICHARD SWAINSON; DINSMORE & CO. 1856
(Covers to) Dinsmore's Complete Map Of The Railroads & Canals In The United States & Canada Carefully Compiled from Authentic Sources by Richard S. Fisher, Editor Of The American Rail Road & Steam Navigator Guide. New-York. Published By Dinsmore & Company, No. 9 Spruce St. Engraved In Relief For Power Press Printing by Schonberg & Co. Acrographers, 75 Nassau Street New York 1856. Entered ... 1856 by Dinsmore & Co. ... New York.
New York: Dinsmore & Company Type: Covers Subject: RailroadCanals Size: 16x10 Reference: cf Karrow 1-1610; cf Modelski 30.
A scarce railroad map of the eastern U.S. with an untitled inset map of North America. The style is a greatly simplified cartography showing railroads and canals. At least two other versions of this map appeared in 1856: one without the inset map (Karrow 1-1609), and one with a different inset map of the City of New York (Modelski 30). Dinsmore published the American Railway Guide in the 1850's which included a smaller railway map (see Modelski 10, 16). Richard Fisher wrote for both Colton and Johnson - Statistical Gazetteer, History of the Civil War, text in the Johnson Family Atlas and Colton's General Atlas, and others. In covers of J.G. Wells, who is also listed as publisher of Karrow 1-1610. Schonberg & Co. are listed as "Acrographers" which is a form of printing we have never seen before. Map is full color by state, and folded into embossed brown cloth covers 16x10 with "New Rail Road Map Of The U. States & Canada J.G. Wells" and a decorative leaf design stamped in gilt. Relief shown by hachure.

FISHER, SAMUEL B. 1836
Map Of The First And Second Anthracite Coal Field. By Samuel B. Fisher Pottsville, Pennsylvania. 1836. Watson's Lith., Philada. Lithog. by J.F. & C.A. Watson, No. 62 Walnut Street, Philadelphia.
Philadelphia: Watson's Lith. Type: Case Map Subject: Mining Size: 116x218 Scale 1:35,000 Reference: cf Tooley Dictionary (Fisher's 1849 Coal Fields Penn.).
Very large and detailed map of the coal fields around Pottsville, Pennsylvania. This must be one of the earliest maps of this type, and we can find no record of it. Watson's Lithography produced other coal maps during this period, and this is earlier than any that were listed. This is an unusual thematic map showing coal deposits and ownership. Edged in green silk and dissected into 36 sections. Map has marbled end sheets and folds into a new dark teal cloth folding case 39x22 with "Pennsylvania Coal Fields S.B. Fisher 1836" stamped in gilt on the spine.

FRANCE. DEPOT-GENERAL DE LA MARINE 1828
(Covers to) Neptune des cotes occidentales d'Amerique sur le Grand Ocean.
Paris: Depot de la Marine Type: Covers Size: 68x52
Reference: Cf. National Maritime Museum. Catalogue, 256.
This volume 7 of Neptune Francois forms an extensive atlas of charts of the western coasts of North and South America, with most charts dated or updated to the 1820's. 25 charts are listed in the index, yet 36 charts are present here. This copy is from the library of the Duc d'Orleans. This issue must be later than the NMM 256, since it has 10 extra charts dated from 1823 to 1828; the latest date in NMM256 is 1822. The eight Vancouver charts appear to be original issues or restrikes from the original plates; the La Perouse charts are absolutely restrikes on newer paper, with the Mappe Monde updated in Australia to show the coastal discoveries in the south. The progression of engraving style from the La Perouse to the 1828 charts is most interesting. The charts of Mexico and South America are largely copies of the Spanish Marine charts issued in the early 1800s showing the Malaspina Expedition tracks (see W. Heckrotte's copy of the Spanish charts). Bound in full red leather covers with decorative gold border and the same titles as above stamped on the spine.

Accompanies Montemont's Histoire Universellle Des Voyages... Large Folio atlas. Not in Phillips. 1st page consisting of four ancient maps lacking. We can find no record of this atlas, other than the Sabin reference and the Oceanie map in Tooley Aust. Monin and Fremin did a smaller world atlas, offered by Hudson in 1988. These maps are large and impressive. They were published with Montemont's 46 volume History of Voyages, although Sabin calls for an Atlas of 22 maps, whereas this has 38 maps on 36 sheets. Maps are without color and bound in quarter leather brown marbled paper covered boards with "Atlas De L'Histoire Des Voyages" stamped in gold on the spine.

FREMONT, J.C. 1845
Map Of An Exploring Expedition To The Rocky Mountains in the Year 1842, Oregon & North California In The Years 1843-44. By Brevet Capt. J. C. Fremont Of The Corps Of Topographical Engineers Under the orders of Col. J.J. Abert, Chief Of The Topographical Bureau. Lith. by E. Weber & Co. Baltimore, Md.
Washington: Blair and Rives Type: Book Map Size: 77x131 Scale 1:1,950,000 Reference: WC 115:2; Wheat 497; Howes F370.
House Issue; map in case. Lacks the astronomical observations that appear in the first issue by the Senate. The large map of the west is one of the most interesting and beautiful government maps of the 1840's. It filled in many of the gaps in cartographic knowledge of the west. Charles Preuss was the cartographer. Map is without color. Book is bound with full leather with "Executive Documents 2d Sess. 28th Cong." on the spine in gold.

FREMONT, J.C.; NICOLLET, J. N. (JOSEPH NICOLAS), 1786-1843 1843
Hydrographical Basin of the Upper Mississippi River From Astronomical and Barometrical Observations Surveys and Information by J.N. Nicollet ... assisted ... by Lieut. J.C. Fremont ... Reduced and compiled under the direction of Col. J.J. Abert in the Bureau of the Corps of Topl. Engrs. by Lieut. W.H. Emory ... 1843 ... W.J. Stone Sc.
Washington: Blair and Rives Type: Book Map Subject: Rivers Size: 92x78 Scale 1:1,200,000 Reference: Bray, p268-270; Schwartz & Ehrenberg p.267-68; Howes N152; WC98; Graff 3022; Sabin 55257.
First edition, first issue. A larger version of the accompanying map was issued in 1842 with scale of 1:600,000 - this version is unknown to us (and anyone else we have met)- Bray states that only 200 copies were printed; the House of Representatives issued this 1843 edition in 1845 with no changes, although Wagner Camp says the map was smaller and Bray states that it was a more faithful representation of the original 1842 map. See Donald Jackson, The Expeditions of John Charles Fremont, for a history of the Nicollet map and all the Fremont maps. Fremont worked extensively with Nicollet on this map and "this was the work which trained Fremont in cartography." (Jackson). This map was the earliest accurate map of the Northern Plains and the Upper Mississippi. G.K. Warren, in his Memoir, stated that this "map was one of the greatest contributions ever made to American geography." Nicollet died in 1843. His map was years ahead of its time, with its regional concept and sound basis in instrument readings and astronomically determined points. Goetzmann: "Had he lived one more decade, Nicollet would undoubtedly have become the official government cartographer of the whole trans-Mississippi West." Rebound in brown fabric covers with "Hydrographical Basin of the Upper Mississippi, I.N. Nicollet, 1843" in gold on the spine.

FREY, A.C.; NELL, LOUIS 1868

New York: A.C. Frey & Co. Type: Pocket Map Subject: Railroad Size: 94x74 Scale 1:1,330,560 Reference: Wheat 1184; Streeter 3929; Norris 2341.
Wheat writes several pages about this map, being impressed with its up to date cartography. Williamson's proposed route through the Owyhee to the Idaho mines is shown, as well as much current detail in central Nevada

and all of California. The influence of Williamson's 1866 "Map of Parts of California, Nevada, Oregon and Idaho Territory" (both the published and the ms version) is obvious. A wheel shows the "Difference of time between S. Francisco and other important Cities." This may be Louis Nell's first commercial map, before his extensive work for the Wheeler Survey in the 1870's and his Colorado maps of the 1880's. The railroad map shows the Union Pacific completed to Cheyenne and the Central Pacific to the Nevada border. This is both a beautiful map and an excellent depiction of California and Nevada just before the completion of the railroad. Wheat mentions that the towns of the Humboldt valley are sprinkled with names that disappear in a few years with the coming of the railroad. Full color by county.

In the Office of Pacific R.R. Surveys, War Dep. under the direction of Bvt. Maj. W.H. Emory, Topl. Engrs. in 1854 and of Capt. A.A. Humphreys, Topl. Engrs. 1854-5-6-7-8. Drawn by E. Freyhold. Reference: Buttery p7,17,18; Schubert/Koepp p57-8.
2nd 1858 edition, adds Ives Grand Canyon expedition. Also adds information from Warren's third expedition. Schubert says there was an earlier 1858 edition that filled in information in Oregon but did not include the Ives information. Schubert also quotes a letter from Warren stating that this edition was sent to the printer in 1859. Freyhold's name appears on the title for the first time. It is dropped in the next (1867) edition and then reappears in the 1868 edition. Rare - apparently there is only one other copy of this map - in the Millard Fillmore Map Collection in the LOC (see Stephenson article in Map Collector No. 12). This copy came from the Bancroft Library as a duplicate - perhaps they thought it was a duplicate of the 1857 edition. With brown wood side rollers. Map is without color and mounted on linen.

Froiseth's first map is actually three maps on one sheet, with a portrait of Brigham Young. Moffat lists two editions of this map, one published by the Skandinavisk Post (this copy) and another by Am. Photo-Lithographic Co., N.Y. Both editions have the Am. Photo Lithographic Co. imprint on the map however. Several copies exist unfolded (see WH's two copies) indicating that there may have been a "pile" of unfolded copies discovered recently. This copy comes from a group of three copies owned by a descendent of Froiseth, and included with our copy were several items of Froiseth memorabilia that probably have significance due to the destruction of all of Froiseth's papers soon after his death (Wheat note). Map is folded into burgundy cloth covers 13.5x8.5 with "Maps Of Utah Territory, Great Salt Lake Valley And Salt Lake City, With Portrait And Autograph Of Brigham Young. 1st edition 1864; published in 27 parts 1854-62. The date of 1872 is estimated by the Australia map; all the maps are undated and probably date throughout the period 1864 to 1872: the North America map shows Colorado and Russian America while the United States map has no Colorado. The World maps show Alaska. This is the last highly decorative atlas published in England. Even the maps without views or figures are beautifully engraved and colored with a mixture of printed color and hand color. Swanston, Petermann, Bartholomew, Macnab and Johnson engraved the maps. The introduction by Shaw among other things lists important general atlases published over a long period. He lists only one United States atlas, Mitchell's Universal Atlas of 1853! The maps bear a superficial

resemblance to Keith Johnston's Royal Atlas. Fullarton frequently gives the sources for his maps - for the United States maps he gives Calvin Smith and Tanner as sources. The atlas is bound in half leather dark green cloth covered boards with "The Royal Illustrated Atlas." stamped in gilt on the cover; the spine reads "Royal Illustrated Atlas" in gold.

The World maps show Alaska. This is the last highly decorative atlas published in England. Even the maps without views or figures are beautifully engraved and colored with a mixture of printed color and hand color. Swanston, Petermann, Bartholomew, Macnab and Johnson engraved the maps. The introduction by Shaw among other things lists important general atlases published over a long period. He lists only one United States atlas, Mitchell's Universal Atlas of 1853! The maps bear a superficial resemblance to Keith Johnston's Royal Atlas. Fullarton frequently gives the sources for his maps - for the United States maps he gives Calvin Smith and Tanner as sources. The atlas is bound in half leather dark green cloth covered boards with "The Royal Illustrated Atlas." stamped in gilt on the cover; the spine reads "Royal Illustrated Atlas" in gold.

(Covers to) Atlas geografico, estadistico e historico de la Republica Mexicana, formado por Antonio Garcia y Cubas. Mexico. Imprenta de Jose Mariano Fernandez de Lara, calle de la Palma numero 4. 1858.
Mexico: Imprenta de Jose Mariano Fernandez de Lara.
Type: Covers Subject: HistoricalStatistical Size: 55x37
The first great atlas of Mexico, produced by a Mexican and printed in Mexico. Sabin says only 300 copies were printed. The maps are of each province, with each surrounded by text. Phillips lists two later editions of 1886 with somewhat different titles. The only atlas of Mexico listed by Phillips that is earlier than this atlas is Humboldt's Atlas...de la Nouvelle Espagne of 1811. Has two very interesting plates at the end that relate to Aztec writing. Garcia Cubas was 26 when he published this. Strangely, then, the verso of the title page has 1846 as the copyright date (when the author was 14?). Maps hand col. with outline color. Atlas is bound in quarter leather brown marbled paper covered boards with title embossed in gold on the spine reading "Garcia y Cubas. Atlas geografico de la Republica Mexicana."

GARDNER, JAMES 1825
Western Hemisphere. Eastern Hemisphere. Projected, Compiled And Drawn, By James Gardner. The Plan Work And Writing Engraved By John Froggett. The Hills By James Palmer. London, Published Sept. 1, 1825, by J. Gardner, Geographer (Agent For The Sale Of The Ordnance Surveys) No. 163 Regent Street. Dublin, Sold By Messrs. Allen & Co. Dame Street. Paris, Goujon, 6, Rue De Bac. Simmoneau, 6, Rue De La Paix. Berlin, S. Schropp & Co. Dresden, E. Arnold ...
London: J. Gardner Type: Case Map Size: 137x264 Scale 1:11,000,000 Reference: British Museum World, p 550.
With 48 inch spheres, this may be one of the largest World Maps produced in the early 1800's. Arrowsmith's Map of the World on a Globular Projection had 36 inch spheres and was last published in 1814. Gardner's map is fairly up to date in the American Northwest, less so in the plains area. He probably used Wyld's and Arrowsmith's maps of North America as sources. Not in Phillips or Wheat. British Museum World catalog lists this edition and an 1837 edition. The drawing and engraving of this map is very elegant and spare. In eight sheets, dissected into 6 sections each, and mounted on linen with dark green silk edging. Outline color. Folds into a new gray cloth folding case 36x23 with "Western And Eastern Hemispheres J. Gardner 1825" stamped in gold on the spine.

(Covers to) Atlas spheroidal et universel de geographie dresse a l'aide des documents officiels, recemment publies en France et a l'etranger par M.F.A. Garnier, Membre de la Societe de Geographie, etc. Paris, Veuve Jules Renouard, Libraire, Editeur de A. Balbi, Abrege de Geographie; A. Guibert, Dictionnaire de Geographie; Dufour et Jomard, Le Globe, etc. Rue de Tournon, 6, Faubourg Saint-Germain. MDCCCLXII.
Paris: Veuve Jules Renouard, Libraire Type: Covers Size: 62x48
This atlas is exceptional for its "spheroidal" maps of the globe, showing the various continents and poles, shaded to give the effect of a sphere floating in space. The remaining maps are also very well executed and colored, mostly by hand, a few in colored litho. In recent years, this atlas has become rare in the trade. This is the only atlas that Garnier produced, according to Phillips. Tooley lists an 1860 edition. Covers are quarter leather marbled paper covered boards with a paper label; the burgundy leather spine is embossed with "F.A. Garnier. Atlas Universel et Spheroidal de Geographie" in gilt. On verso of half-title: Paris -- Imprimerie de P.-A. Bourdier et Cie., Rue Mazarine, 30.

San Francisco: A. Gensoul, Pacific Map Depot. Type: Pocket Map Size: 89x91 Scale 1:950,400 Reference: Graff 80; Streeter 511; Wheat 1122.
Wheat: "In Arizona the year 1865 was made notable by the first great map of that Territory, the 'Official Map of the Territory of Arizona...by Richard Gird'...Gird's richly varied map concentrates upon Arizona and adjacent parts of California and Sonora..." Wheat also reprints a portion of Bancroft's description of Gird's life. Streeter lists the Hartley Map of Arizona as circa 1863 and hence earlier that the Gird; Wheat disagrees, listing Hartley as 1865 (as, he claims, the Library of Congress does also), thus making the Gird the more important map: "Except that it is overshadowed by Gird's great map, Hartley's production would receive more attention here." Gird's map is full of interesting detail and is also a beautiful graphic production. Full color by county. Folded into blue patterned cloth covers 16x11 with "Gird's Official Map Of The Territory Of Arizona. A. Gensoul, Publisher." printed in gold on a black paste down label.

GODDARD, GEORGE H. (GEORGE HENRY), 1817-1906 1857
Britton & Rey's Map Of The State Of California. Compiled from the U.S. Land & Coast Surveys, the several Military, Scientific & Rail Road Explorations, the State & County Boundary Surveys made under the Order of the Surveyor General of California, & from Private Surveys. By George H. Goddard, C.E. Completed with Additions & Corrections up to the day of publication from the U.S. Land Office & other reliable sources. Lithy. Of Britton & Rey, Montgomery St. Cor. Commercial, S.F. Entered ... 1857 by Britton & Rey ... California. Engraved by H. Steinegger.
San Francisco: Britton & Rey Type: Wall Map Event: California Gold Rush Size: 77x64 Scale 1:1,520,640
Reference: Wheat Gold 302, pp39-42; Streeter 2819; Peters p124.
1st edition. Wheat: "This map, a beautiful example of the cartographer's art, is unfortunately rare and little-known...it was by far the most accurate and complete map of California and of its gold regions which had as yet been published." This copy was issued as a wall map, but it has been nicely restored, varnish removed, rebacked on paper without the rollers. The other examples I am aware of were all pocket maps. See Shumate essay on Goddard. A second edition, reduced in size, was published in 1858, and a third edition was published in 1860 (see WH copies). Map is unvarnished and without rollers. Outline color by county with a full color wash.

Reference: Streeter 2785; Wheat Gold 281; Cowen p243. Wheat calls this "rare but otherwise unimportant," due to some misspellings and inaccuracies in the map. Streeter sale illustrates the map and the price realized was the same as the Eddy map of 1853. I find the Wheat inaccuracies minor, with most of them being misspellings. The overall map is impressive. It would be interesting to find the map or maps that were used as sources. Ouline color by state. Folded into dark brown cloth covers 16.5x11 with "Map Of California And Adjacent Country By F. Goodwin" stamped in gilt.

GOUJON, J.; ANDRIVEAU, J. 1836
Tableau Comparatif et Figure de La Hauteur des Principales Montagnes et du Cours des Principaux Fleuves due Monde. Les Fleuves graves par Dumortier. Les Montagnes par A. Hocquart. La Lettre par Arnoul. Paris. Chez J. Goujon & J. Andriveau. Geographes - Editeurs. Rue du Bac, No. 6, Pres le Pont Royal. 1836.
Paris: Goujon, J.; Andriveau, J. Type: Atlas Map Subject: Mountains/Rivers Size: 56x89 Reference: Walter, John A. The Heights of Mountains and the Lengths of Rivers. Considered by many to be the artistic and factual high point in the comparative mountains and rivers charts, a convention developed in the 19th century. Beautifully colored with fine graphics and art and closely corresponding statistical tables, it presents an appealing balance. Different mountain ranges in different colors. Extensive annotations on vegetation, volcanic activity, and lichen, no doubt derived from Humboldt. Of course, due to the early date, the geographical data does not reflect many later discoveries, like taller waterfalls in Yosemite or the

actual length of the Nile. Shows 7000 meter high hot air balloon flight by Guy-Lussac in 1808. Mounted on heavy linen. Sheet 48 in disbound atlas.

GRAY, R.; WILKINSON, ROBERT 1811
North America from the most authentic and latest surveys. R. Gray Sculpt. Glasgow, 1811.
Glasgow: R. Gray Type: Fabric Map Size: 53x62 Scale 1:9,300,000 Reference: cf Stevens & Tree 62(a)
This is a copy of the 1804 Wilkinson North America map, here printed on linen. Very Scarce. Wilkinson's map of 1804 has been somewhat simplified to allow for limited detail due to printing on fabric. See our #5156 for the Wilkinson 1804 map (see also our copy of the 1826 reissue of Wilkinson's map which appears to be unchanged from the 1804 issue). With a decorative border of vines and tiny vignettes. John Faupel suggested this was probably made as a "commemorative" piece in a very small issue.

GREEN, JOHN, D. 1757; JEFFERYS, THOMAS 1753
A chart of North and South America including the Atlantic and Pacific Oceans, with the nearest coasts of Europe, Africa and Asia (by John Green]. Publish'd according to Act of Parliament Feb. 19, 1753, by T. Jefferys, Geographer to his Royal Highness the Prince of Wales at the Corner of St. Martins Lane Charing Cross ...
London: Thomas Jefferys Type: Case MapChart Map Size: 127x114 Scale 1:21,000,000 Reference: Stevens & Tree (Complete Chart) 1753(a); Wagner Northwest Coast 578 and p.160; Schwartz & Erhrenberg p158; cf Streeter 3453; P-Maps p109; cf Lowery 404.
The 1st ed. of this map, here published as a complete chart of six sheets joined, dissected into 16 sections and folded into Jeffery's original case with a printed label: "Bought of Thomas Jefferys Engraver..." Both map and case are preserved in a new half cloth blue marbled paper book-like case 36x31 with "Green And Jefferys. Chart of North and South America. 1753." stamped in gilt on a leather label on the spine. This is one of the most important American maps of the period, the first to label Behring's Straits, and the most accurate of the time in establishing more correct placements of the coasts of North and South America and Northeastern Asia. The map is extensively annotated by Green to show the differences of latitude and longitude between his placements on the map and other cartographers, notably Bellin, D'Anville, Brouckner, Popple, and especially DeLisle and Buache in their claims of new discoveries on the American Northwest coast. Jefferys also published Green's "Remarks, In Support of the New Chart of North and South America, in six sheets" which further detail Green's attack on DeLisle's cartography and French claims to the American Northwest. The six sheets of this map are also found bound individually with the text, as in Streeter 3453. Our copy has a printed paste down label in the lower corner of sheet six that explains the color code used to distinguish the different claims of the British, French, etc. Stevens & Tree list several later issues of this chart, including those that appear in Jeffery's American Atlas of 1775. Outline color.

GREENLEAF, JEREMIAH 1848
(Covers to) A New Universal Atlas; Comprising Separate Maps Of all the Principal Empires, Kingdoms & States Throughout the World: and forming a distinct Atlas Of The United States. Carefully Compiled from

the best Authorities Extant by Jeremiah Greenleaf. a new edition revised and corrected to the present time. 1848.
No place: J. Greenleaf. Type: Covers Size: 38x32
Rare reissue of 1842 Greenleaf Universal Atlas. Many changes from the 1842 edition: Florida a State, Michigan entirely redrawn, Mexican War results on North American map, Mexico, Texas, Oregon changes to show 1846 boundary with Canada, Missionary stations listed on the Hemispheres, and many new railroads, counties, boundaries, etc. There are more changes between this edition and the 1842, than between the 1842 and Burr's 1836. Not in Karpinski, which is strange because Michigan is totally redrawn, not in Phillips or any other reference. There is also an 1849 edition (property of C.W.) that has similar maps except the Mexico map does not reflect the Mexican War boundary - probably he was running out of maps and this was at the bottom of the stack! Has the same Geography text in the rear, unchanged. The Wisconsin and Iowa map in this copy differs from an 1848 in Fitch Catalogue 48, #314, in having Mandan Dist. instead of Missouri Territory in the Fitch, making this copy probably later (the 1842 has Missouri Territory). Burr's name is no longer on the map of Illinois. Maps are in full color. Bound in half leather, floral patterned blue cloth covered boards with "The Universal Atlas" stamped in gold. Spine reads "Atlas". Marbled lining.

GREENLEAF, MOSES, 1777-1834 1829
(Covers to) Atlas accompanying Greenleaf's map and statistical survey of Maine ... Portland -- Shirley & Hyde Publishers, (1829)
Portland: Shirley & Hyde Type: Covers Size: 35x22
The third U.S. state atlas, after Mill's North Carolina and Burr's New York State. Contains six maps, one of which is a sheet of Geologic sections, and a sheet of Meteorological Diagrams. The maps are engraved by William Chapin of New York. The atlas accompanied Greenleaf's Survey of the State of Maine and his Map of Maine, all published together in 1829. The first four maps relate to the Northeastern Boundary dispute and are the only maps published in Maine that dealt with the boundary question. The fifth and sixth maps relate to grants, patterns of settlement, population, etc. The final plate gives Meteorological diagrams with information derived from Greenleaf's own observations of climate. In original half leather, marbled paper covered boards with printed title and index label. This copy has notes from Portland Bookseller Francis O'Brien written in 1954 and stating that "This copy is from the noted Maine collection of Janus G. Elder of Lewiston, Maine ... See tribute to him in the preface to Williamson's Bibliography of Maine."

Date thought to be 1846. 3rd Edition, second state. Aroostoock County is expanded in the north. York county in New Brunswick has a new Military road and the rivers around it are more detailed than 1844 edition. Rivers are added and lengthened in Canadian counties along the St. Lawrence. Inside Maine we can't find changes other than the change of the Aroostoock county line. The 1846 date is estimated based on the changes in the map. With black top and bottom rollers. Full color by county. Relief shown by hachures. Tracts (roads or trails) and railroads shown.

This is the third reissue of the 1859 Gunn map of Kansas, which was originally issued with a Handbook showing routes to the Mines, etc. The 1859 edition was by Gunn only; Mitchell was added to the 1861 and all subsequent editions (1862, 64, 65, 66, and 67). The 1859 edition is very rare (Howes "d"), and the later editions of the map only are scarce (not in Heaston's list or Phillips). Karrow lists all the editions except the 1867 (see our copy). The map is of eastern Kansas west to the 98th meridian, with an inset of the "Routes from the Missouri River to the Kansas Gold Mines." This inset does not show Colorado, even though it was formed in 1860. There is a list of the Population of Kansas Counties, and a vignette of an Indian.

Mitchell issued his own Sectional Map of Kansas in 1859 (Karrow 13-0585). There is an advertisement for Mitchell's Law practice and Land Agency on the inside of the map cover. Border color by county. Covers are a dark brown cloth 16x11 with "Gunn & Mitchell's New Map Of Kansas And The Gold Mines" stamped in gilt.

New York: Ackerman Lith. Type: Book Map Size: 110x76 Scale 1:240,000 Reference: Wheat 765.
One of the earliest, and most important government maps of the Great Salt Lake area. Wheat calls this map "a major production...for the Great Salt Lake itself the map was definitive...Scientific cartography for the Territory of Utah may be said to date from the appearance of this map." It is a stunning map, large in scope, and clearly shows the genius of Charles Preuss as a cartographer. Issued in a folder with the large Stansbury "Map of a Reconnoissance between Fort Leavenworth..." Bodies of water have light blue outline color.

HAASIS & LUBRECHT 1871
The American Union Railroad Map Of The United States, British Possessions, West Indies, Mexico, And Central America. 1871. Published by Haasis & Lubrecht, 107 Liberty Street, New York. Smith & McDougal, Electrotypers, 82 Beekman Street, New York. (inset) Central America.
New York: Haasis & Lubrecht Type: Case Map Subject: Railroad Size: 95x132 Scale 1:4,435,000 Reference: Modelski 53 (1872 ed.), 55 (1874 ed.).
This is a reworking of the Lubrecht and Rosa map "The American Continent" of 1864, and the first edition, first issue in a new format. Statistics at the top of the 1864 map are here replaced with a view "From the Atlantic to the Pacific Ocean" emphasizing the recently completed transcontinental railroad. Also, an elaborate title and view of a steam engine and train station have replaced the more subdued 1864 title. Population tables of the United States are added to the left and right sides of the map. The map itself has been updated to show political and some topographical changes of the ensuing seven years. Projected railroad lines are shown running everywhere in the west. The coloring is very bright, to match the decidedly optimistic (expansionist) flavor of the map. D.L. Guernsey published editions of 1871 and 1874 in Concord New Hampshire, with no major changes in the map. WH has an 1873 edition by Haasis and Lubrecht that adds text next to the population figures, more railroads, no changes in topography. Issued in a cover with a label in German from Wilhelm Lubrecht in Stuttgart, Germany, indicating it may have been sold to emigrants. Full color. Map has green paper edging, is dissected into 16 sections, and fold into a new gray cloth folding case 35x27 with "American Union Railroad Map Haasis & Lubrecht 1871" stamped in gilt on the spine.

HAGAMAN AND MARKHAM; PEABODY, M.M. 1837
Map Of The Village Of Auburn. Published By Hagaman & Markham 1837. Engraved by M.M. Peabody for the Publishers. (inset) Profile of the Grand Erie Canal.
N.P.: Hagaman & Markham Type: Separate Map Size: 43x69 Scale 1:6,000 Reference: Tooley Dictionary (Peabody).
Scarce, unusual map of Auburn, New York. I can find no references to this beautiful map. A plan of the village is in the map's center, with large views of the Theological Seminary and the State Prison on the left and right corners. Nine views of public buildings are on the right, some of which have "J.J. Hagaman, Arch." written below. I presume this is our map maker Hagaman. Beneath the title is a profile of the Erie Canal. The entire map has a stark, black and white aspect, heightened by the view of the State Prison which has a black sky above it.

HALE, NATHAN 1827
A Map of the New England States, Maine, New Hampshire, Vermont, Massachusetts, Rhode Island & Connecticut, With the adjacent parts of New York & Lower Canada. Compiled and Published By Nathan Hale, Boston 1826. Engraved by J.V.N. Throop. Entered ... the 14th day of August 1826 by Nathan Hale of Massachusetts. (inset) Northern & Eastern Part Of Maine And Part Of Lower Canada And New Brunswick. (1827?)
Boston: Nathan Hale Type: Case Map Size: 116x96 Scale 1:520,000 Reference: Phillips Maps p472.
Colored by county; engraved by J.V.N. Throop. 1826 on title. Shows the Farmington Canal extended to Northampton, Mass., which is further than the uncolored 1826 edition, so we presume it was updated at least a year later. Later Editions published to 1853. The quality of the engraving is extraordinary. Throop engraved Ohio for Lucas' 1823 General Atlas. Tooley lists an O.H. Throop of New York who engraved for Amos Lay (New York 1832) as well as for Asa Whitney, and a D.S. Throop who also engraved for Lay (U.S. 1832). Map is bordered in green

silk , dissected in 24 sections, and folds with marbled end sheets into a blue marbled slip case 26x21.

HALL, S. (SIDNEY) 1830
(Covers to) A new general atlas, with the divisions and boundaries carefully coloured; Constructed entirely from new drawings, and engraved by Sidney Hall. (1st ed.). London, printed for Longman, Rees, Orme, Brown and Green, Paternoster Row, 1830.
London: Longman, Rees, Orme, Brown and Green Type: Covers Size: 63x52 Reference: Phillips, 758; Wheat, C.I. Mapping the transmississippi West, 380, 381, 386; Tooley, R.V. The mapping of Australia and Antarctica. 2nd ed., p. 92-93.
Unusual presentation in two large elephant folio volumes with the maps unfolded. Covers are three quarter leather, marbled paper covered boards with "Hall's Atlas Part 1" and "Part 2" respectively, stamped in gilt on the front and spine. Wheat mentions the United States, Mexico and Guatimala, and British North America maps: he declares them up to date, making good use of the Lewis and Clark and Long maps. Interestingly for a British cartographer, Hall shows Maine and Oregon with the most ambitious U.S. claims as to territory. Graphically, these maps are very striking and beautiful; with outline color. Hall did a revised edition in the 1850-57 period (Phillips 821). The Australia maps are also mentioned by Tooley (Australia and Antarctica). In 1840 he collaborated with A. & C. Black to produce Black's General Atlas -- however, those maps are somewhat smaller and not as impressive as these maps. The maps are dated variously from 1827 to 1830, with the title page dated 1830. This may indicate that the atlas was first issued in parts.

HALL, WM. HAM. (WILLIAM HAMMOND); CALIFORNIA STATE ENGINEERS OFFICE 1888
Rainfall Distribution Map to Accompany Report on Irrigation and Water Supply in California. Wm. Ham. Hall, State Engineer. On this Map the areas in the State, over which the average annual precipitation ranges between 5 and 10, 10 and 20, 20 and 30, 30 and 40, 40 and 50, 50 and 60, 60 and 70, and 70 and 80 inches, respectively, are approximately outlined and distinctively shaded. And the average rainfall at the several stations of observation is figured for each.
Sacramento: California State Engineering Department. Type: Separate Map Size: 73x50
Date estimated from data. Includes table of 220 California precipitation stations, listing the period of record (typically about 15 years) and the mean annual rainfall (precipitation). Hall's note indicates that later data and his one erratum, would lead to a few changes in the map. His note also indicates that the southern Sierra is wetter than his map shows - a correct conclusion. Comparison with the 1979 California Water Atlas map entitled, Mean Annual Precipitation, List No. 5788.008 in the David Rumsey Collection, shows that the pattern of precipitation shown by Hall is correct; however, some of the long-term (based on approximately a 100-year period of record) high-end values should be somewhat greater than Hall shows. Noteworthy differences are that the northwest coastal areas and central coast area of the Santa Lucia Mountains are considerably wetter than Hall indicates. In summary, a remarkably accurate map. Small hole in paper, near Red Bluff. Map scanned from the collection of the Water Resources Center Archives, University of California Library, call number mG409162 B1. In color. Mounted on linen.

HAWAII. GOVERNOR 1906
(Title Page to) Report of the Governor of the Territory of Hawaii to the Secretary of the Interior. 1906.
Washington: Government Printing Office Type: Covers Size: 23x15
With nine maps, most folding and large (Maui is 110x133) showing land uses, topography, ownership, etc. The maps are dated around 1900 and are very interesting and attractive. The text and the maps give a look at the early commercial development of the islands. Several of the maps date from the Hawaiian Government Survey, headed by W.D. Alexander, the Surveyor General. This survey predated the U.S. take over in 1899. The later maps are by the Hawaii Territory Survey, Walter E. Wall, Surveyor. On the title page is stamped "Private Property of M.M. O'Shaughnessy." He built the Hetch-Hetchy water system for San Francisco as chief city engineer and many other important public works. Earlier in his career, he worked in Hawaii as a consultant to the plantations for various improvements (see DAB).

HAYES, ELI L. 1877
(Covers to) Illustrated atlas of the Upper Ohio River and Valley from Pittsburgh, Pa. to Cincinnati, Ohio. From United States official and special surveys compiled & drawn for the publishers by E.L. Hayes, assisted by E.F. Hayes, C.M. Beresford, assisted by S.A. Charpiot, F.L. Sanford, J.H. Sherman. Published by Titus, Simmons & Titus, 27 South Sixth Street Phila. 1877. Eng. by Worley & Bracher, 27 So. Sixth St. Phila, Pa. Printed by H.J. Toudy & Co. 623 Commerce St. Phila, Pa. Oldach & Mergenthaler Binders, S.E. Cor. 4th & Cherry Sts. Phila. Entered ... 1877, by Titus Simmons & Titus ... Washington. (view by) A. Ruger, del ...
Philadelphia: Titus, Simmons & Titus Type: Covers Size: 42x46 Reference: P2348, 2442; Rieger 46; Checklist of printed maps of the Middle West to 1900, 1-1260; LC United States atlases, L3876; P-Maps, p. 636.
This is perhaps the most extraordinary "county atlas" produced in the 19th century. Although it is a regional atlas in scope, covering both sides of the Ohio River from Pittsburgh to Cincinnati, in format it is county atlas with views, maps, and advertising directories of the local towns, cities, residences, and businesses along the river. There are 26 double page maps of the Ohio River, plus an index sheet, that are beautifully drawn and colored, as well as numerous maps of towns and cities on the river. The views frequently show the river and river boat traffic, the inside and outside of factories (an inside view of a glass blowing factory is amazing), and farms and residences. There are large fold out maps of Pittsburgh and Cincinnati. When taken all together, the effect is stunning. This atlas has become rare, with few copies surviving the "breaker's" temptation to cut it up. Rieger rates it "of extraordinary importance" and "extremely scarce." Bound in half leather dark brown cloth covered boards with "Illustrated Atlas Of The Upper Ohio River & Valley. From Pittsburgh Pa. To Cincinnati O. Titus, Simmons & Titus." stamped in gold. Full and outline color.

Boston: Geo. H. Walker & Co. Type: Covers Size: 19x12 Reference: Cf. Phillips. Maps of America, p. 160 (1883 ed.)
Tilly Haynes was the proprietor of the United States Hotel. He drew both maps. The larger map is titled "New map of Boston giving all points of interest..." The second, somewhat smaller map is "Bird's eye view of Boston Harbor..." The maps and the brochure accompanying have many ads for the U.S. Hotel, which ties in to the fact that they were drawn by the "Resident proprietor" of the Hotel. The maps are very well done. This may be one of the few times that a cartographer managed a hotel. Covers are tan card board with the title "New map of Boston with an extra new map of the harbor. Giving all points of interest or attraction in city, seashore, or suburbs. Revised and corrected for the season. Price 20 Cents. Geo. H. Ellis, Printer, 141 Franklin St., Boston." printed in gold.

(Title Page to) Frances A. Henshaw's Book of Penmanship Executed at the Middlebury Female Academy April 29, 1823.
Middlebury, Vermont.: Manuscript Type: Title Page Subject: Children's MapsSchool Size: 25x20
Exquisite hand drawn maps of the states. Notwithstanding the title, this is a geography book hand drawn by a very promising student. It includes descriptions of Astronomical Geography, the Ptolemaic, Brahean and Copernican Systems, Comets, Great Circles, Equator, Meridian, Horizon, Colures, Tropics, Polar Circles, Zones, Climates, Latitude and Longitude, a section titled America, and 19 maps of the states with a descriptive page for each. The maps are copied from the 1805 edition of Carey's American Pocket Atlas, except for Ohio, which is from Arrowsmith and Lewis' Atlas, 1812, and Indiana, from an unknown source. The text is copied from Morse's Geography Made Easy, probably 1807, 11th edition, but certainly before the 12th edition (which was changed substantially); the text describing the maps is original. The only mystery is why she used such out of date sources if, in fact, she made this book in 1823. The penmanship is remarkable both in the execution of the maps and text. One of a kind. At the bottom of the title page: "presented to her son T.A. Post - Feb 4th 1872." Emma Willard led the Middlebury Female Academy from 1807-9, see DAB.

HITCHCOCK, CHARLES H. (CHARLES HENRY), 1836-1919; NEW HAMPSHIRE. GEOLOGICAL SURVEY 1878
(Title Page to) Atlas accompanying the report on the geology of New Hampshire. C.H. Hitchcock, State Geologist. 1878. Julius Bien, New York.
New York: Julius Bien Type: Title Page Subject: Geology Size: 85x63 Reference: Sabin 52833; Cobb. New Hampshire maps to 1900, 348; P2135; Marcou. Mapoteca geologica americana, 229-231; LeGear. Atlases of the United States, L 2299.

17 maps and plates as called for in Vol III, p.vii of text. Huge folio atlas with 2 plates of views, 2 facsimiles (Carrigain 1816 and Holland 1784), 1 diagram or Camera view, a 6 sheet Geological Map of the state, a 5 (of 6, as issued) sheet Map of the state's Surface Geology, and a map of the Ammonoosuc Mining District. The upper northwest sheet of the Surface Geology map was not printed because it is entirely of Vermont, except for a tiny part of the lower right corner which was covered by making the uppper northeast sheet about one inch wider in the Surface Geology issue than it is in the Geological (six sheet) issue. The matter is further confused by Sabin calling for 16 plates and Phillips and LeGear calling for 9. Cobb calls for 17 and the most important list, in the text of the report itself, calls for 17. We believe this was the only large folio Geological Atlas made of an eastern state, on the scale of the western survey atlases of Powell, Hayden, Wheeler and King, during the same period. Most maps have printed color although the Ammonoosuc Mining District map is fully hand colored.

HOFFMANN, CHARLES F.; J.T. GARDNER; WHITNEY, J.D.; GEOLOGICAL SURVEY OF CALIFORNIA 1869
Geological Survey Of California, J.D. Whitney, State Geologist. Map of a portion of the Sierra Nevada adjacent to the Yosemite Valley from surveys made by Chs. F. Hoffmann and J.T. Gardner, 1863-1867.Map of a portion of the Sierra Nevada adjacent to the Yosemite Valley.
N.P.: No Publisher Type: Wall Map Size: 52x77 Scale 1:126,720 Reference: Wheat 1194.
This map is among the most detailed and largest scale maps of Yosemite issued during this part of the 19th century, rivaled only by the Wheeler Survey map of Yosemite published in 1883. This is a second issue of this map, here mounted as a wall map. This is the same as the first issue that appeared with the Yosemite Guide Book (see our #4212) except that it adds "Hite's Cove" on the Merced River just slightly west of its junction with Devil's Gulch. In the (1870) third issue (our #4650) Hite's Cove is relocated to a point just south of the Merced on the road titled "Road to Hite's Cove" and the erasure of the prior label is apparent. We have dated this second issue (1869) as a best guess. With black top and bottom rollers, and pink linen edging. Map is without color.

HOFFMANN, CHARLES F.; WHITNEY, J.D.; GEOLOGICAL SURVEY OF CALIFORNIA 1873
Topographical Map of Central California Together With a Part of Nevada. (Sheets III & IV). State Geological Survey Of California. J.D. Whitney, State Geologist. C.F. Hoffmann, Principal Topographer, V. Wackenreuder, J.T. Gardner, A. Craven, A.D. Wilson, Field Assistants. 1873 ... Julius Bien, Engr.
New York: Julius Bien Type: Separate Map Size: 65x126 Scale 1:380,160 Reference: cfWheat 1238, note 43, p332; Vogdes p178.
South 2 sheets of 4; top 2 sheets never issued; thus complete. Two unmounted sheets on heavy paper. Never folded. Hoffmann was the principal topographer. Wheat says the Northwest sheet was issued; does not mention the northeast being issued. WH says the two northern sheets were issued with areas left unsurveyed; he doubts that they were ever mounted on linen and colored. So the bottom two in this issue can be considered "complete". Vogdes lists the date as 1872 (and elsewhere as 1873!). We think 1873 is correct. Vogdes says sheet II, northeast sheet, was issued in 1872; he also dates sheet III and IV as 1872, and sheet III as having an 1871 issue (Fitch had a copy of this 1871 sheet III issue on thin paper, folded into covers, Cat. 41). There is a note on the map reading "The portion of Nevada included between the parallels ... taken from the work of the 40th Parallel Survey in charge of Clarence King, by permission of Genl. A.A. Humphreys, Chief of Engineers." Outline color by county.

Reference: Wheat 1240.
First edition, second state. Shows mineral deposits by color. Lineal descendent of the 1869 larger map of California and Nevada by Holt, Gibbes, and others. Also shows 10, 20 and 30 mile railroad grants. This is not the first state of the first edition - that has 11 land districts instead of the 14 found on this copy (see our #5154). The "unexplored" area in the Northeastern corner of California has been removed with much topographical detail changed

from the first state. Eureka County is added in Nevada. The change of the Land Districts from eleven to fourteen includes a radical change in boundaries, some names changed, and numbering changed, indicating a major restructuring of the General Land Office administration in 1873. Map is folded into red cloth covers 16x10 with "Holt's Map Of California And Nevada." in gilt.

San Francisco: Warren Holt Type: Case Map Size: 153x128 Scale 1:760,320 Reference: cf Vogdes p203 (1876 edition); Wheat 1202 (1869 edition).
This edition is not in Vogdes (he lists editions of 1869, 1876, and 1888). The copyright date is 1876, so it is probably similar to that edition. There are many changes, as one would hope (or expect) between this and the 1869 edition, both in graphic composition and topography. The map has been completely reengraved by S.B.Linton (the original engraver) and shows much of the General Land Office surveys. It is so full of detail as to be difficult to read in many areas. Two views are added: the Capital-Nevada, and University-California. The 1888 edition is reengraved completely yet again (WH's copy). This copy belonged to Lewis M. Clement, Chief Engineer of the Atlantic & Pacific Railroad. The inside of the case flap closure reads "Lewis M. Clement, Chief Engineer of the Atlantic & Pacific Railroad - Office: Safe Deposit Building Room 8 - San Francisco, Cal." in calligraphic manuscript. The map is slightly trimmed at the bottom (affecting only the decorative border) in order to fit into his custom brown cloth case 28x17. Map has outline color, is in two sheets (Northern and Southern halves), each undissected and mounted on linen.

First (and only?) ed.. One of the earliest school atlases to use a system of letters on blank maps that are coded to a separate key list. This method was based on a teaching system formulated by Johann Hubner (1668-1731) and

adapted by Homann. Four celestial maps illustrate the systems of Ptolemy, Tycho Brahe, Copernicus, and Descartes. Fourteen keyed maps show the countries and continents of Europe, Asia, Africa and the Americas. California is shown as an island on the Americas map, and listed under islands in the key. Homann published an Atlas Scholasticus in 1732 (Phillips 577) which was also a collaboration with Hubner. Scarce. Maps are in full color, and atlas is bound in untitled red marbled paper covered boards with a vellum spine.

New York: William Hooker Type: Pocket Map Size: 32x39 Scale 1:15,600 Reference: Haskell 717.
A very attractive and totally cluttered map of the city showing all the important Churches, public buildings, Banks, etc. Hooker lists himself as "Instrument Maker & Chart Seller to the U.S. Navy" and his shop as the place "Where all the Nautical Works by Edm. M. Blunt are Published & by him Inspected." Map is folded into untitled brown card board covers 13x8.

New York: William Hooker Type: Pocket Map Size: 32x39 Scale 1:15,600 Reference: Haskell 765.
Haskell shows editions of 1824, 1826, 1828/29, 1833, 1838, and 1842. Compared to the 1828/29 edition, the listing of churches and public buildings has been expanded and the map shows new development in the northern parts of the city. For some unexplained reason, Hooker has dropped the appellation "Hydrographer" and is now just "Engraver." Map is folded into red leather covers 12x7.5 with "Hooker's Plan of New York" stamped in gilt.

Wood block print. Hand colored. In Japanese. Shows the world based on Buddhist literature from India and China. This map is based on a Buddhist conceptual view of the world with India at the center, yet it includes contemporary European geographical knowledge -- Europe is shown as a group of islands in the upper left corner and South America is is an island in the ocean south of Japan on the right side. The map has many place names in Asia not found on European maps of the period. In the center of the map in the Himalayan Mountains is a quadruple helix symbolizing the origins of the four great rivers of the region (the Indus, the Ganges, the Brahmaputra and the Sutlej rivers) emanating from the heads of a horse, a lion, an elephant, and an ox. This is the site of the present day Lake Manasarovar, the highest fresh water lake in the world. "A land bridge connects China to an unnamed continent in the upper right corner ..."--Cortazzi. Relief shown pictorially. Bibliography. Title in Nihon kohan chizu shusei: Nanzenbushu bankoku shoka no zu. Folded in cover 24x19. Has annotations in red ink.
